Computer Science Undergraduate / Full-Stack Developer Intern / Flutter Developer

SUMMARY

- Computer Science undergraduate and Full-Stack Developer Intern with project experience building responsive web and mobile applications using React.js, Node.js, Flutter, Firebase, and MongoDB. Skilled in REST APIs, authentication, real-time applications, payment integration, database-driven systems, and collaborative software development.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, C, C++, JavaScript, Dart
- Frontend & Mobile:** React.js, Flutter, HTML5, CSS3, Material UI, Responsive Design, Provider
- Backend & APIs:** Node.js, Express.js, REST APIs, JWT Authentication, Firebase Authentication, Cloud Functions
- Databases & Storage:** MongoDB, Firebase Firestore, MySQL, Hive
- Low-Code & BPM:** Appian, Neutrinos
- Tools & Platforms:** Git, GitHub, GitHub Actions, Postman, DBeaver, VS Code, Android Studio, Firebase Hosting
- Additional:** Razorpay, Google Maps API, ML Model Integration, Agile Practices, Sprint Planning, Code Reviews

EXPERIENCE

- Full-Stack Developer Intern, Al Rajhi Takaful** Apr 2026 – Present
Remote
 - Contributing to enterprise-scale software development within the insurance technology domain, supporting the delivery of modern web applications.
 - Working across full-stack application architecture with exposure to frontend development, backend services, RESTful APIs, database systems, and secure software engineering practices.
 - Collaborating in an Agile development environment, emphasizing clean code, maintainability, performance, and scalable application design.
 - Continuously strengthening expertise in enterprise application development, software architecture, API-driven systems, testing, debugging, and version control.

PROJECTS

- FixItNow: All Services at One Place** [\[Live Demo\]](#) Jul 2025 – Nov 2025
React.js, Node.js, Express.js, MongoDB, Firebase
 - Led a five-member team and designed the architecture for a service-booking platform supporting more than 20 service listings.
 - Built REST APIs for listings, bookings, and users; implemented Firebase role-based access for customers, providers, and administrators.
 - Improved booking reliability through validation, structured API responses, and reusable frontend components.
- College Canteen Ordering App** Feb 2025 – Jul 2025
Flutter, Dart, Firestore, Razorpay, Hive, Provider
 - Architected real-time ordering and order-tracking workflows using Provider state management and Hive-based cart persistence.
 - Integrated Razorpay payment confirmation, failure, and retry flows; developed QR-based pickup and a real-time administrative dashboard.
 - Designed separate user and administrator workflows for menu management, order updates, and payment tracking.
- Signature Verification System** [\[Live Demo\]](#) Aug 2024 – Jan 2025
MERN Stack, Python, Deep Learning
 - Developed APIs for image upload, preprocessing, and inference while integrating a Python deep-learning model with a MERN backend.
 - Implemented access controls and modular backend services for signature data and future model improvements.
- Disaster Management & Relief Coordination App** Hackathon Project
Flutter, Firebase, Google Maps API, Cloud Functions
 - Led development of one-tap SOS alerts, nearby shelter mapping, and role-based volunteer and administrator dashboards.
 - Built real-time rescue coordination, resource allocation, community support, and donation workflows.
- Megathon 2025: Insurance Digitization Platform** Top 10 Finalist
React.js, Node.js, MongoDB, REST APIs, JWT
 - Led a team to build and present an insurance digitization prototype within 48 hours at E-Cell IIIT Hyderabad.
 - Collaborated with CHUBB mentors to align application workflows, APIs, data handling, and solution design with business requirements.

LEADERSHIP & ACHIEVEMENTS

- Project Team Lead:** Led cross-functional teams of up to five members through architecture planning, sprint execution, code reviews, task allocation, and successful project delivery.
- Megathon 2025 Finalist:** Secured a Top 10 finish by designing and presenting an insurance digitization platform within a 48-hour national hackathon organized by E-Cell IIIT Hyderabad.
- AWS Summit New York 2026:** Attended AWS Summit New York to gain exposure to the latest advancements in cloud computing, generative AI, serverless architectures, DevOps, and enterprise software development.

EDUCATION

Keshav Memorial Institute of Technology, Hyderabad
Bachelor of Technology in Computer Science and Engineering

Expected June 2027
