

Vinay Shankar Adepu

Full Stack Developer

Hyderabad, IN • +91 996-612-0406 • vinayshankar412@gmail.com • linkedin.com/in/vinay-adepu/

Full Stack & Flutter Developer with hands-on experience building mobile and web applications using Flutter, React.js, Node.js, Firebase, and MongoDB. Proven team lead across academic and hackathon projects, delivering end-to-end solutions including real-time dashboards, payment integrations, and role-based systems. Strong exposure to AI/ML integration through practical implementations such as signature verification systems.

SKILLS & OTHER

Mobile & Web Development: Flutter, Dart, React.js, HTML5, CSS3

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication

Databases & Storage: MongoDB, Firebase Firestore, MySQL, Hive

Cloud & Backend Services: Firebase (Auth, Hosting), Firebase Hosting

Payments & Integrations: Razorpay, Custom API Integration

Frontend & UI: Material UI, Responsive Design, UI/UX Design

Programming Languages: Python, Java, C++, JavaScript, Dart

Machine Learning Exposure: ML Model Integration, Signature Verification, Evaluation Metrics

Tools & Dev Workflow: Git, GitHub, GitHub Actions, Postman, VS Code, Android Studio

Project Leadership: Agile Practices, Sprint Planning, Code Reviews, Team Leadership

PROJECT EXPERIENCE

FixItNow – All Services at One Place

Jul 2025 – Nov 2025

Team Lead | Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase

- Led a 5-member team to build a full-stack service booking platform using React.js, Node.js, Express.js, MongoDB, and Firebase, supporting 20+ service listings.
- Defined overall system architecture and distributed development tasks, implementing scalable RESTful APIs to support core booking workflows.
- Developed RESTful APIs for service listings, bookings, and user management.
- Implemented role-based authentication using Firebase Authentication to securely control access for customers, service providers, and admins.

College Canteen Ordering App

Feb 2025 – Jul 2025

Team Lead | Flutter Developer

Tech Stack: Flutter, Dart, Firebase Firestore, Razorpay, Hive, Provider

- Defined application architecture and distributed development tasks, implementing scalable workflows for real-time order placement and tracking.
- Implemented state management using provider and persistent local storage with Hive to ensure smooth cart recovery and session continuity.
- Integrated Razorpay payment gateway with secure order confirmation, failure handling, and retry flows.
- Built a QR-based order pickup system and a real-time admin dashboard to manage order status and reduce manual coordination.
- Led task allocation, resolved technical blockers, and ensured on-time delivery through iterative development cycles.

Signature Verification System Using MERN and Deep Learning

Aug 2024 – Jan 2025

Full Stack Developer (MERN)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python (ML)

- Designed system architecture and developed RESTful APIs to handle image uploads, preprocessing, and ML model inference.
- Integrated a Python-based deep learning model into the MERN backend for automated signature verification workflows.
- Implemented secure data handling and access control to protect sensitive signature data.
- Optimized backend design using modular services to support scalability and future model enhancements.

HACKATHONS & COMPETITIVE PROJECTS

Disaster Management & Relief Coordination App

Team Lead | Full Stack Developer

Tech Stack: Flutter, Dart, Firebase Firestore, Firebase Auth, Google Maps API, Cloud Functions, REST APIs

- Led the design and development of a disaster management application to improve rescue and relief coordination during emergencies.
- Implemented one-tap SOS alerts enabling victims to quickly notify authorities and volunteers.
- Built safe-zone and shelter mapping features to guide users to nearby relief locations.
- Designed role-based dashboards for volunteers and admins to manage rescue operations and resource allocation.
- Integrated community support and donation modules supporting multiple relief categories and real-time contribution tracking during emergency scenarios.
- Focused on system reliability, usability, and real-world crisis response scenarios.

Megathon 2025 – Insurance Digitization Platform

Hackathon Finalist (Top 10)

E-Cell IIIT Hyderabad | Powered by CHUBB Insurance & Qualcomm

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

- Led a team to design and build a digital insurance solution addressing real-world insurance workflow challenges.
- Collaborated with industry mentors from CHUBB to align technical design with business and compliance needs.
- Developed a functional prototype combining fronted UX, backend APIs, and data handling within a 48-hour timeframe.
- Presented and pitched the solution to industry judges, securing a Top 10 finish among competing teams.
- Strengthened skills in rapid problem-solving, system design, and technical pitching under pressure.

EDUCATION

Keshav Memorial Institute of Technology, Hyderabad, IN

Bachelor of Technology, Computer Science and Engineering
